

We will be reading Flat Stanley,

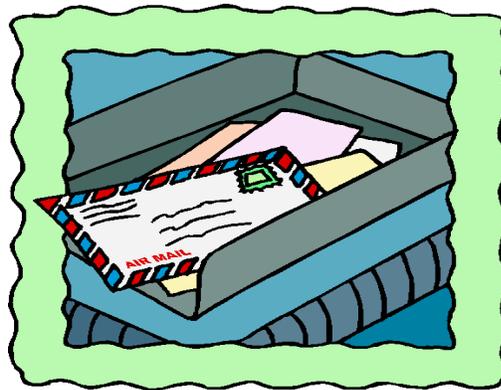

a story of Stanley Lambchop who had a most terrible accident!

A large notice board fell on top of him and now he's  $\frac{1}{2}$ " thick!

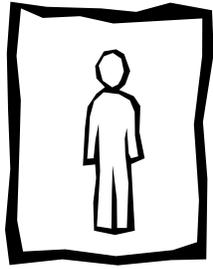

The good news is that he has wonderful adventures.

We are making our own! We will decorate our Flat Stanleys and prepare them for mailing. Our Flat Stanleys can have wonderful adventures, too. Since they don't have to be home until the end of May, they will have 8 months to travel. How many adventures and places they visit will be up to their hosts. There is a cover sheet and pages for journal entries on the next pages to explain how this works. Since it will be on our Class Web Page, they can access it their themselves. When you receive the replies, please keep them in a folder or scrapbook. You may have your Flat Stanley return to your house after each adventure or they can be sent directly to the next location to visit...your choice. This will be a good opportunity for your child to organize the information as it is sent back.

I can hardly wait until they all come back together!

All "Flats" must be back by 1 June 2009.
